Pharmacy student feedback on CORE readiness.

The University of the Pacific School of Pharmacy and Health Sciences recently conducted a student survey on the impact of CORE readiness on their preparation for IPPE externships.

Did CORE readiness courses enhance your learning experience?

5% Disagree 5% Neutral 90% Agree

Did you find CORE readiness course subject matter useful?

5% Disagree 7% Neutral 88% Agree

Student comments...

"For the most part, I liked the topics that were chosen since they weren't discussed in class. The site was easy to use and understand, so it wasn't hard to figure out what to do. After completing the assignment, there are no improvements that I could think of."

"I thought the CORE readiness modules were helpful and efficient. I found the information useful and it was more interactive than just reading PowerPoint slides since there is an assessment at the end."

"I liked how the modules were briefly to the point of relative and important information and not overly exhausted with information that would be forgotten after reading. I enjoyed it and see this as a viable learning experience in the future."

"I really like the content provided on the CORE readiness modules. I find it very informative and applicable."
